

Office municipal
d'habitation
de Montréal

Montréal, November 13, 2024

To the tenants of Habitations Du Parc Frontenac

1901, rue Frontenac

A meeting was held on November 1st with the project director who is responsible for the work in your building. 26 people were present.

Visits to all apartments starting November 18 to:

- modify the balcony door handle
- check to see if your living room window screen is in the right place
- lubricate the balcony door window to make it easier to open.

Follow-up on work

Balcony doors and apartment windows have been changed throughout the building.

The balconies of the apartments on the library side are finished and accessible. The balconies of the apartments on the Rue du Havre side should be finished by the end of the year.

Entrances and safety

During the meeting, we heard from those present about their safety concerns.

Between now and the end of the work, we will replace the front doors with doors that are more robust.

de Montréal

Those present at the meeting also asked us if it was possible to have the doors open for shorter periods of time for safety reasons. We are going to look into this.

There was talk of improving the lighting in front of the front door. Three more powerful lights will be installed.

A meeting regarding security is scheduled for early 2025 with the community organizer, Edith Guzman, the OMHM security team and other partners.

If you have safety-related concerns, you can call the OMHM Call Centre at 514-872-6646.

If you have questions about the work, please contact Éline St-Onge, Liaison Officer at 514-872-9543.
